IT IS NOT ONLY 3D...

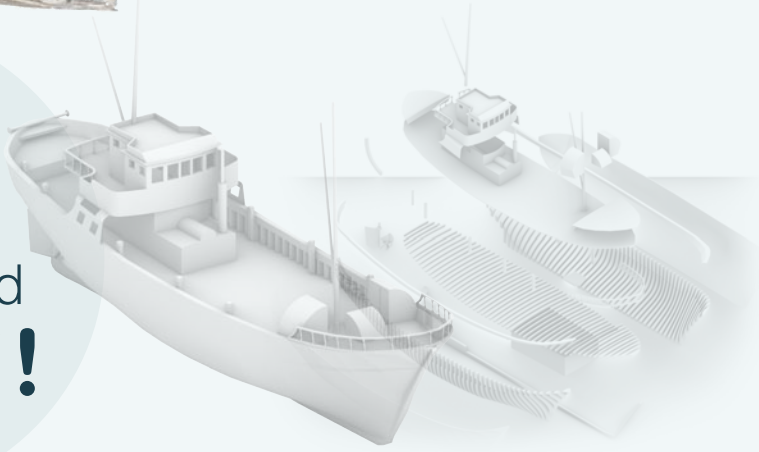

IT IS THE

#MEMORYTWIN

We capture the **HISTORY** behind the object, not only its geometric structure.

We preserve **MEMORY**, **VALUE** and **IDENTITY!**

IT IS NOT ONLY METADATA... IT IS ALSO PARADATA

When digitising an object it is important to know **HOW** the data acquisition was carried out. The requirements, equipment used, the team, software and hardware, weather / environmental conditions... They all matter for understanding the **QUALITY** of the 3D model and its context.
