AI4LAM Working Groups

AI4LAM wants to stimulate broad activity within the area of AI in GLAM. One platform for such activity is working groups, where stakeholders from different institutions with common interests can come together and work collaboratively.

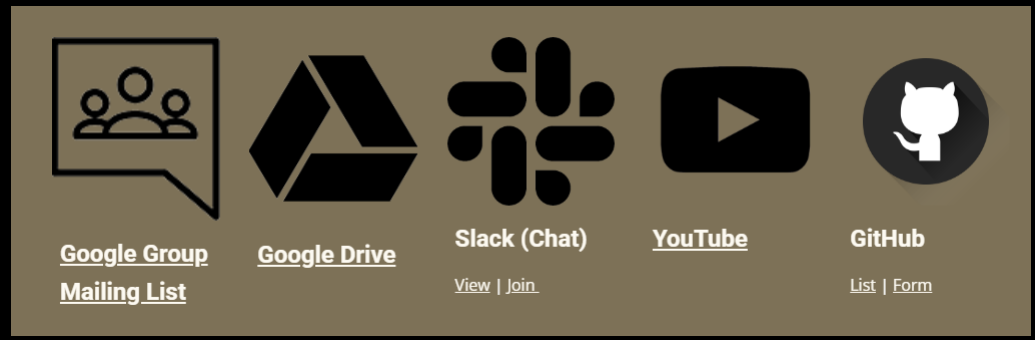
WORKING GROUPS

Old Working Groups:

- Evaluation WG
- Metadata WG
- Speech-to-Text WG
- Teaching and Learning AI WG

New Groups:

- Named Entity Recognition,
- Ethics and Data Sharing,
- AI Literacy,
- AI Infrastructures,
- Chatbots and Collections Explorers,
- Web Harvesting,
- AI Agents and Accessibility of Data,
- AI Cybersecurity,
- AI in 3D and Image Analysis,
- Automatic Text Recognition.



AI4LAM

3D and Image Analysis Working Group

Focuses on two complementary domains — the acquisition and creation of 3D models and the application of artificial intelligence for analysing 3D models and image (pictorial) data. The group aims to bridge data generation and advanced AI-based interpretation.
